HXR-NX5 Series Software update procedure

*Necessary equipment
・HXR-NX5 Series for update
　(Memory card and FMU128 removed)
・AC Adaptor (AC-VL1 and Connecting cord)
　(The update software will not accept battery operation)
・USB Cable (Supplied accessory)
・PC (Windows XP, Vista or Windows 7- 32 bit)
・Update software (NX5V2_Update1005a.zip) (>Software download)

Note for PC
　All other application software must shut before starting update.

Update of the camcorder

1. Unzip NX5V2_Update1005a.zip and extract the folder to your desktop.
2. Double click "NX5V2_Update1005a.exe" in the extracted folder, and the dialog box for the update process will be displayed (Fig-1).

3. Turn on the camcorder power using AC adaptor and Connecting cord.
4. Connect the camcorder to the PC via USB cable. When "USB SELECT" displays on the LCD panel, select "A" and wait until "Connected" is displayed.
   (Confirm that icon appears in the Task Tray right bottom of the PC, then Click Next. See Fig-2.)

Fig-3

5. If the update is necessary, "Current version" and "Version after the update" displayed at the bottom left of the dialog box will be different. Click Next and proceed. (Fig-3)

   NOTE: If already updated, the dialog box shows "The update is not required. The update process is aborted" Click Finish and complete.

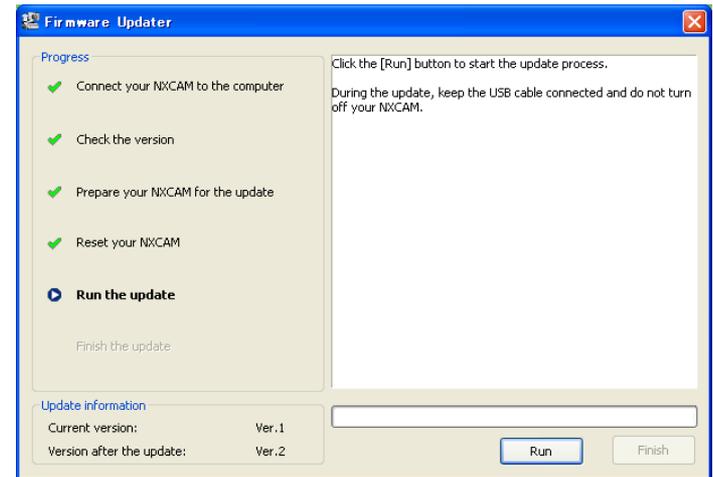

6. Disconnect the USB connection by "Safely Remove Hardware" process, click icon in the Task Tray at the bottom right of the PC. When "Safe to Remove Hardware" is displayed on the PC, keep the USB cable connected. Press RESET button on the camcorder and when the LCD panel goes off, you then Click Next.
