

Custom Preset 07: 5296FILM (by Alistair Chapman)

Custom Preset 08: TERRA1 (by Luis de la Cerdá)

Custom Preset 09: TERRA2 (by Luis de la Cerdá)

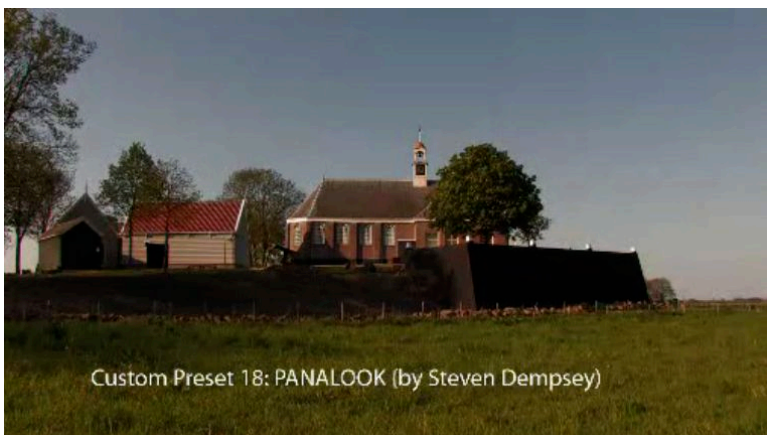

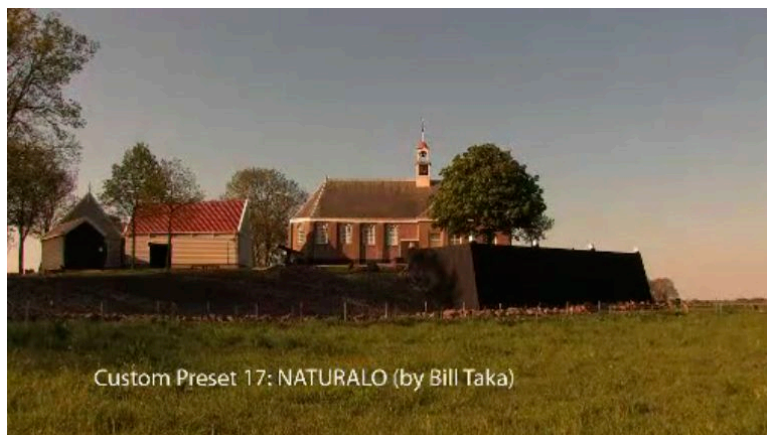

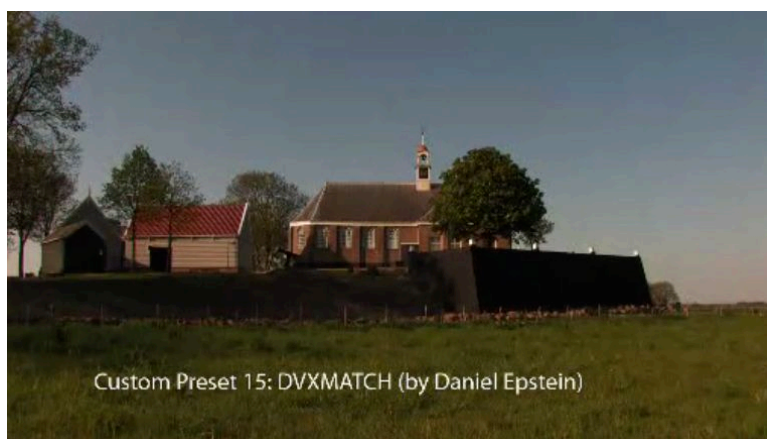

Custom Preset 10: DISJECTA (by Steven Dempsey)

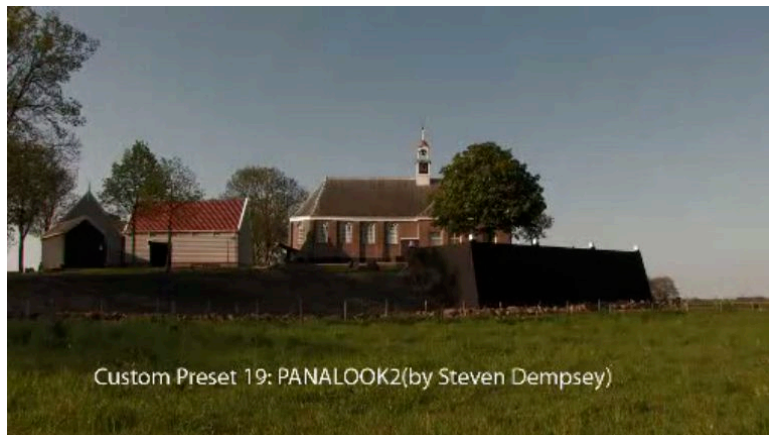

Custom Preset 11: B&WJECTA (by Steven Dempsey)

Custom Preset 12: NOMAGENT (by Lauri Kettunen)

Custom Preset 19: PANALOOK2(by Steven Dempsey)

Custom Preset 20: REALITY (by Kees van Duivenbode)

Custom Preset 21: BLEACHBP (by Juan Diaz)

Custom Preset 22: NOMAGENT2 (by Lauri Kettunen)

Custom Preset 23: MEMORY (by Meryem Ersoz)

Custom Preset 24: TRUECOLOR (by Paolo Cicone)

The Canon XH-A1 can use 20 Custom Presets stored on a SD Memory Card.

Each preset is called 'PRESETxx.CPF' (where xx = 00 to 20)

All preset files must be put in a directory called 'PRESET'

All Custom Presets can be found on www.dvinfo.net

or

The Dutch website: www.xha1.nl and forum: forum.xha1.nl

Workflow:

1. Switch on camera in 'Manual mode
 2. Switch on Custom Presets
 3. Select Custom Preset xx (xx=00 to 20)
 4. Put the Expodisc on Canon XH-A1 lens
 5. Set exposure level
 6. Set whitebalance
 7. Remove Expodisc from Canon XH-A1 lens
 8. Set exposure level
 9. Record scene for 20 seconds
 10. Goto 2 and select the next Custom Preset
- (During the test several SD cards were used to store the Custom Presets)

Many thanks to all users of DV(i).net and XH-A1.NL forum who shared their knowlegde and Custom Presets to make this test possible. This movie will be updated in the future when more presets will be available.
