JOIN US FOR A FREE DEMO ON THE NANO FLASH!

The nanoFlash is a compact, very light weight, camera mountable HD and SD recorder that produces high quality images. Playback is visually indistinguishable from a live uncompressed image.

The nanoFlash takes the full uncompressed 4:2:2 image from any HD-SDI or HDMI camera and records it using high bit-rate recording in a format of your choice. This is a significant advance for many cameras, including the very popular Sony EX1/EX3.
