

varispeed

VSC-27

The Clarity Image Varispeed Controller added to your Panasonic Varicam turns your camera package into an image creation powerhouse. For the first time with video camera technology, you will have the ability to program a controlled framerate change over a defined period of time. **This feature known as “Ramping,” had been reserved for film cameras. Now the Clarity Image Model VSC-27 brings this control to digital cinematographers.**

for the **VARICAM**

Features

- Smooth, real-time framerate changes
- User defined ramp times
- Build & store multi-step macros
- Unlimited number of steps in each stored macro
- Display of VTR status & current framerate on LCD
- Camera Recorder Start & Stop control
- Full VTR control (Play, FF, RW, Stop, Record & Review)
- Remote on/off (Turns VSC-27 off without disconnecting control cable)
- High contrast LCD display w/backlight allows unit to be viewed in total darkness or full sunlight
- Field upgradeable firmware for future features
- Loop through port allows a Panasonic EC3 remote to be used simultaneously with the Varispeed Controller
