

## Genus Cinema Plate Adaptor Bars System for Canon Cinema EOS Cameras

### Shown :

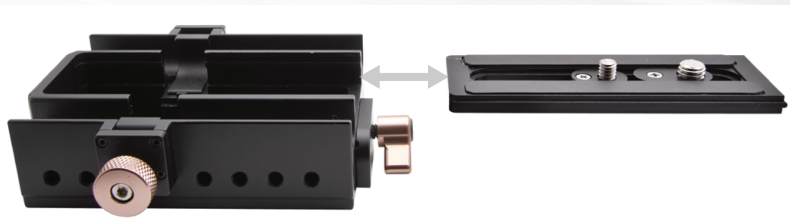

- GMB-CCP - Genus Cinema Plate
- Canon EOS C300 Camcorder
- GWMC - Wide Clip-On Matte Box system
- GHEB - Height Extension Bracket

The Genus Cinema Plate Adaptor Bars System was specially designed for Canon Cinema EOS Cameras. By utilising industry standard 15 mm rods the box mount ensures compatibility with other accessories. You can accessorise your camera with the easy attachment of matte boxes, and follow focuses.

Manufactured from aviation grade aluminium makes the rig both strong and light weight. The Box plate comes with a pair of 215mm rods and a pair of 200mm extension rods.

The Genus Cinema Plate Adaptor Bars System provide 3/8" and 1/4" screws for attaching to the Canon Cinema EOS Cameras. The baseplate has standard 1/4" and 3/8" holes on the bottom for mounting onto a tripod.

Quick release function was designed for the camera plate. It can be easily attached or detached from the baseplate by rotating the camera plate baffle.

**Left:** Detachable Camera Plate  
**Bottom:** Adjustable Camera Plate Baffle  
**Bottom-left:** Box Adaptor Plate with rods
