DVD Segments

Your Story

We meet with you and your partner to document your story - how you met, what you felt at the time and how you feel about each other now. We can visit your favorite places and film you persuing your normal activities. This section can include details on where you grew up and we can even include family photo's. There is also the option of interviewing parents & friends talking about their hopes for your future. All this is presented as a 3-5 minute segment designed to be shown at the reception. We have our own HD projector & screen if one is not available at the venue. If you prefer we can simply include it on the DVD.
