

Legs from 91mm x 18mm
 Hinges drilled in vertical leg at 50mm centres to take 60mm x 45mm coach bolt
 Hinges drilled in angled leg at 50mm centres (to sit to keep box level when changing height)
 Avoid drilling across or crossing with glass covers

Laptop = Compaq Presario V8000
 Laptop support design to take Presario and location of hinges were determined by the top of screen hitting back board
 Plastic screen opens to 140 degrees
 Check your own laptop B&B and screen opening and make laptop screen and keyboard support to suit
 Hinges to hinge computer support to have hinge point down so hinge can be set flush with cow
 Screw holes may have to be counter sunk as the hinge will be fixed reverse to what it is designed for
 Stop to be fitted to stop hinge support going past 40 degrees
 Shoot bolt fitted to hold hinged support when projecting.
 Hinged support down for best sitting, up for projection.
 Width of box make allowance for mouse receiver on one side and flash drive on the other.
